## INTRODUCTION

The Institution of Engineers (India), established in the year 1920, stands today as the testimony to the vision of bygone era as a Body of Engineers with a membership of 0.56 million. IE(I) , one of the largest professional associations in the World, obtained Royal Charter from King George V in 1935 to promote and advance the science, practice and business of Engineering in all its branches in India. Encompassing 15 Engineering disciplines, IE(I) has been fulfilling its obligations through 94 Centres in the Country and 5 chapters in abroad with numerous technical activities at the International, National, State and Regional level for the past 87 years. IE(I) holds every year National Conventions in each branch of Engineering to bring out the latest trends and future projections.

The Civil Engineering Division Board of IE(I) so far organized twenty four National Conventions of Civil Engineers on contemporary themes. The 25th National Convention of Civil Engineers will be organized by the Andhra Pradesh State Centre of IE(I) at Hyderabad on 23rd and 24th October, 2009 in the form of a National Seminar on Climate Change Abatement - Role of Civil Engineers. This Seminar provides an opportunity to bring the Experts, Scientists, Engineers from different sectors of Civil Engineering, industries, academia and research institutions on a common platform to share their experiences. It is an unique opportunity also for students and research professionals from academic institutions to exchange their knowledge and experiences, to come out with collaborative projects benefiting all.

If **Weather** is a description of physical conditions in the atmosphere (humidity, temperature, pressure, wind and precipitation), then **Climate** is the pattern of weather in a region over a long time period. The interactions of atmospheric systems are so complex that climatic conditions are never exactly the same at any given location from one time to the next.

The biggest environmental threat the world is facing today is **climate change**. This threat is mainly caused by an accumulation of greenhouse gases resulting from various large-scale anthropogenic processes. Consistent and large increases in temperature and extreme heat waves produce significant impacts on temperature-sensitive sectors. Carbon dioxide release from fossil-fuel use is a dominant factor. Engineers can play important roles in responding to this threat by the development and application of appropriate technologies.

The Engineers have a unique perspective on climate change and a pivotal role in shaping long-term sustainable practices in water management and industry and in shaping future technologies to reduce GHG

emissions. Engineers understand the issue from a social and economic perspective and also the technological challenges and are able to work towards making the changes that achieve climate change mitigation. Civil Engineers are the key group of professionals with the requisite skills and have a vital role in developing and implementing technologies to reduce GHG emissions while working in construction and transportation sector or for Solid waste management and are vital in advocating for government policies to address climate change.

## PROGRAMME MODULE:

The programme of the National Convention will consist of Inaugural Session, Six Technical Sessions, Panel Discussion and Valedictory Session. Dr K L Rao Memorial Lecture will be delivered by eminent experts from the interdisciplinary fields of Civil Engineering field. Experts from both industries and academia / research are being approached to deliver Invited lectures broadly on the theme and following sub-themes of the National Seminar. Besides the Invited Talks, a limited number of selected technical papers are planned for presentation in the Convention.

## SUB-THEMES:

- Climate Change - Challenges for Civil Engineers
- Construction & Transportation - Impacts on Climate & Its Management
- Land Utilization and Development
- Water Use and Waste Water Disposal
- Solid Waste Disposal - Climate Change Abatement
- Green Building Concepts - Today's Requirement

## CALL FOR PAPERS

Technical Papers relevant to the theme and sub-themes( but not necessarily limited to these only) are invited from Researchers, Field Engineers, Academia, R&D institutions and Industries. All papers, after a review by Technical Committee will be published in the Technical Volume of the Convention. The dates and deadlines for submission of papers are given below
